

TRIAL / HIKING MODEL
ESCAPE

NEW FEATURES ESCAPE 2020

FRAME

Initially developed for competition, Electric Motion chooses to provide its standard model with a high-end frame made of 15CDV6 steel tubes and micro fused pieces in 25CD4S. The frame itself weighs less than 5kg. All conditions are there to live a breathtaking experience

BATTERY

The new Electric Motion battery pack is more efficient than ever. Its new, last generation BMS (Battery Management System) guarantees the best performance in use and in time. The new battery pack is more compact, lighter, removable and has a 60% longer operating life. It will make you wonder who will be exhausted first: your battery or yourself.

DESIGN

The art of distinguishing itself, with a line and completely new colors, the Escape is more daring and elegant. With clean details and an original line cut with a scalpel, you have understood the Escape heals his style, his signature.

ERGONOMICS AND TECHNOLOGIES

The new cockpit gives you all the information you need with only the blink of an eye.
Ergonomic map control, remaining battery life on display (in %) for even more riding comfort.

PELS/PRB

- PELS (Progressive Electronic Lever Switch):
Progressive switch that simulates electronically a clutch. Very useful and efficient, it gives a better control of the power and allows turning it off very quickly (safety and efficiency).
- PRB (Progressive Regenerative Brake):
Enables the use of an electric and progressive brake, which charges the battery while in use. On top of that, this system brings a comfortable security on the hard slopes, while avoiding the brakes overheating

ON ROAD KIT

The new on road kit consists of a new head light and a new license plate holder. This new on road kit has a new design, more compact and robust for Off Road use.

ESCAPE 2020

The Escape is the perfect bike to ride off-road from Electric Motion.

Extend your boundaries and discover new horizons with the capabilities and performances of the new Escape. With this brand new model, the adventure is now pushed to the extreme.

Reach across the borders and live the adventure with the Escape.
